**ECONYL® Regenerated Nylon:
No waste. No new resources.
Just endless possibilities.**

Made from waste, ECONYL® is infinitely recyclable and can unleash endless possibilities. It's all part of the ECONYL® brand vision to make the world a better place by pioneering closed loop regeneration processes and delivering sustainable products.

ECONYL® reduces the amount of global waste by collecting both pre and post-consumer waste, including

spent carpet, fishing nets, fabrics and industrial plastic components, and regenerating this waste into new nylon that has the same quality as virgin products. For every 10,000 tons of ECONYL® raw material, we are able to save 70,000 barrels of crude oil and avoid 57,000 tons of CO₂ emissions. And, best of all, ECONYL® is engineered so it can be entirely regenerated again, and again—pushing ever closer to Aquafil's ultimate goal of a fiber made from 100% post-consumer waste, while maintaining ultimate standards in performance and quality.

• Specifications are based on averages from normal manufacturing tolerances. Such variations do not affect product performance.

• Protective chair pads are recommended under office chairs with roller casters to preserve appearance and avoid premature wear.

• As with all quality carpets, slight variation in color may occur from dye lot to dye lot.

• Backing or other materials may be changed without prior notice when shortages occur or when technological advancements provide improved product performance.

• This product is intended solely for use as an indoor floor covering and is not recommended or sold for any other purpose.

• The inherent characteristics of geometric linear patterns can result in double-dark or double-light lines at the seam and to some extent pattern run-off or bias. This is not a manufacturing defect, and as such, should be considered when selecting a modular carpet installation method.

• Please make your final selection from an actual swatch. To order samples, go to manningtoncommercial.com or call 800.241.2262 ext. 6913.
