Array of Design Choices

Mannington Commercial Legacy Hand-Crafted Hardwood Collection offers a variety of choices for today's designers

- Plank width 5"
- A variety of species and colors
- Low luster
- Full bevel

A Foundation of Quality

- Premium wood species provide beauty and durability to our top face
- 100% North American Hardwoods give our inner plies incredible strength and stability

Ultimate Finish Durability

- 8-step Quantum Guard HP™ finish features aluminum oxide particles suspended in urethane and UV cured
- Quantum Guard HP™ provides unsurpassed protection against normal wear, while ScratchResist helps protect against fine scratches that dull the appearance of other wood floors
- More durable than any on-site finish, this factory applied finish allows floors to be easily maintained

Engineered for Universal Installation

- Most can be installed on, above or below grade
- Can be installed using glue, nail, staple, or float methods (style dependent)
- Precision-engineered UltraFit™ Tongue and Groove System ensures a consistent, uniform fit and easy installation

Constructed for amazing strength and stability

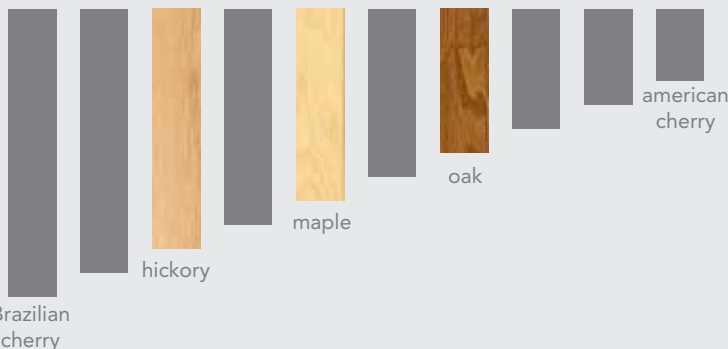

- Cross-grain construction provides greater dimensional stability than solid wood flooring
- 1/2" thickness provides strength for demanding commercial environments

hardness of species

hardness scale

hardest

softest

The density and hardness of wood products varies by species. The hardness of species scale can help determine the optimal wood selection.

Use recommendations are based on performance, cost, and the design criteria of the space—not solely on performance.

R: Product is RECOMMENDED for end use

NR: Product is NOT RECOMMENDED for end use

Where NR is noted; the following code explains why for a particular use, another Mannington Commercial product may be more suitable than a wood flooring product

1. A product having more water resistance/slip resistance should be considered

2. Static control flooring normally recommended in this area

3. High Traffic area

NOTES:

a. In most cases, medical and veterinary applications are similar.

b. All furniture must have floor protectors. Casters must be clean and operate properly (minimum 1" width)

c. Mannington Commercial Hardwood Floors are not recommended for commercial kitchens.

d. Food and beverage spills must be spot cleaned immediately. No standing water

e. Non-staining walk-off mats required at all exterior doors to keep sand, dirt, grit, grease and oil outside

f. Not recommended if high level of static control is required; i.e. conductive or static dissipative.

NOTE: Mannington Commercial Hardwood floors are not recommended for exterior use or where golf or track shoes are present.

wood moldings

Finish the Mannington Commercial Wood Floor with moldings that blend with and enhance its appearance.

reducer strip

For joining wood flooring to another floor of different height such as resilient or carpet.

t-molding

Used to cover the expansion space between wood floors and other floors of approximately the same height.

wall base

Covers the expansion space between the floor and the wall.

step down

Covers the expansion space on stair edges and provides a finished trim.

quarter round

Covers the expansion space between the floor and a wall.

baby threshold

Used at doorways to finish the space where the wood floor ends

FEATURES

The classic beauty and rustic charm of hardwoods are brought together flawlessly in the Legacy Hand-Crafted Hardwood Collection, featuring stunning wood grains with warm, inviting finishes that bring a touch of old world elegance and new world sensibility to any commercial setting.

Quality engineered with a cross-grain construction for maximum strength and dimensional stability compared to solid wood flooring. Premium wood species are used for top ply surface and 100% North American hardwoods for the inner plies. Northern hardwoods are used for the top ply because they produce a tighter grain, exceptional strength and long term durability.

Quantum Guard™ HP is an 8-Step finish featuring aluminum oxide particles suspended in urethane and UV cured. Limited 5 Year Quantum Guard™ HP Finish Warranty.

Precision-engineered UltraFit™ Tongue and Groove System ensures a consistent, uniform fit and easy installation.

- Engineered hardwood flooring utilizes more of each log than solid wood flooring and a variety of hardwood species are used for the inner plies which reduces forest waste.
- Logs are rotary peeled on a lathe using a knife instead of a saw blade eliminating the kerf or sawdust waste.
- Our hardwood veneer layers are bonded with a water-based and solvent free adhesive.
- We use our mill wood waste as fuel for creating process steam to heat logs, dry the veneer, and heat buildings.
- Mannington engineered hardwood floors are low emitting. Technology improvements allow us to use solvent free components and finishes. There is no formaldehyde added during any steps of manufacturing and product both Phase I and Phase II compliant to CARB (California Air Resources Board) formaldehyde requirements.
- All components of Quantum Guard™ HP are made with 100% solids and contain no VOC's.
- Installation adhesives comply with strict state and federal VOC regulations and contain no chlorinated solvents or ozone depleting chemicals. Adhesives meet VOC content limit of SCAQMD Rule #1168 and may contribute to LEED IEQ Credit 4.1.
- Legacy Hand-Crafted Hardwood Collection is manufactured in Highpoint, North Carolina and may contribute to LEED RM Credit 5.1 and 5.2.
- Legacy Hand-Crafted Hardwood Collection meets the FSC controlled woods standard. A Pure FSC option is available for large projects.
