GHS-US Labeling
Hazard Pictograms (GHS-US) :

Signal Word (GHS-US) :
Hazard Statements (GHS-US) :
This product contains crystalline silica (quartz sand). IARC classified crystalline silica as Group 1 carcinogen. Both IARC and NTP consider silica as a known human carcinogen. Evidence is based on the chronic and long-term exposure workers have had to respirable sized crystalline silica dust particles. Because this product is in liquid or paste form, it does not pose a dust hazard; therefore this classification is not relevant. (Note: sanding of the hardened product may create a silica dust hazard).
