FORMATS

A modern kitchen interior featuring a long white countertop with a stainless steel sink and a four-burner gas cooktop. Below the countertop are dark grey cabinets with silver handles. A built-in oven is visible in the cabinetry. To the left, a white dining table is partially visible with bright yellow chairs. The floor is covered in a dark green, textured resilient sheet. A large window on the left side of the kitchen provides a view of a balcony with a black metal railing and some greenery outside.

RESILIENT SHEET

QGHP

QUANTUM
GUARD® HP
WEARLAYER

A modern interior space with a geometric patterned floor in shades of grey, white, and dark brown. The floor is composed of large rectangular tiles arranged in a complex, interlocking pattern. In the background, there are several concrete pillars and wooden benches with a dark finish. The lighting is soft and even, highlighting the textures of the materials.

PERFORMANCE

To be up to Mannington's standards for performance, each flooring product must be easy to maintain and look great for years to come. These priorities are built into our products, to make your life easier and reduce your overall budget.

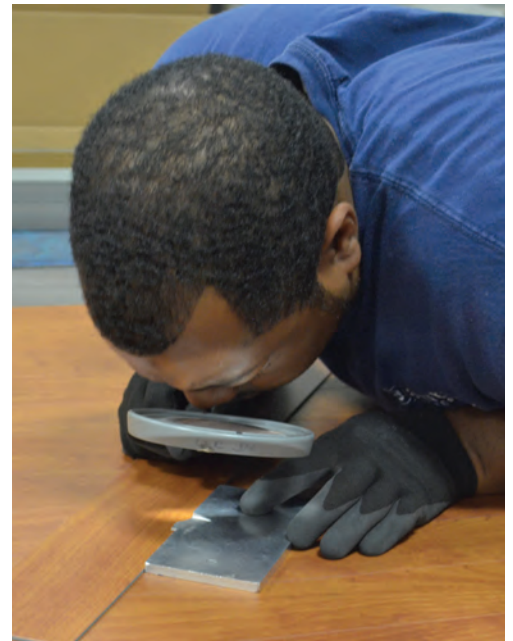

Quantum Guard® HP is our patented aluminum oxide UV cured wear layer that eliminates the need for polish, while enhancing durability, cleanability, appearance retention, and slip resistance when compared to standard resilient floors.

SUSTAINABILITY

Our mission is to let our actions speak in our sustainability initiatives. We focus on our community, on being transparent, and on accountability in all endeavors.

MADE IN THE U.S.A.

Made in the U.S.A. means jobs. By manufacturing sheet flooring, LVT, VCT, rubber and carpet in the U.S., we have been able to keep people employed, which in turn keeps local economies healthy and thriving - while ensuring the highest levels of service and quality in the industry. Mannington Commercial is the only manufacturer in the U.S. with the capability to produce a click system LVT.

PERFORMANCE

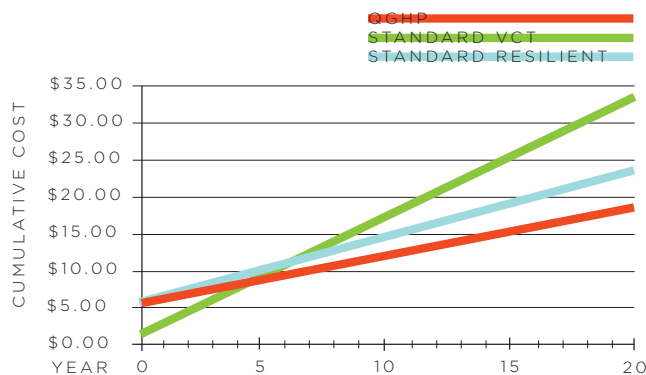

Producing quality products that perform with exceptional durability in demanding commercial environments is the foundation of our performance technologies. Long term product performance and appearance retention translates not only to keeping the space looking better longer, but to a flooring that has a lighter environmental impact and lower total cost of ownership. Mannington flooring products reduce the total cost of ownership and a reduced environmental footprint.

QUANTUM GUARD® HP

Patented. Tested. Proven.

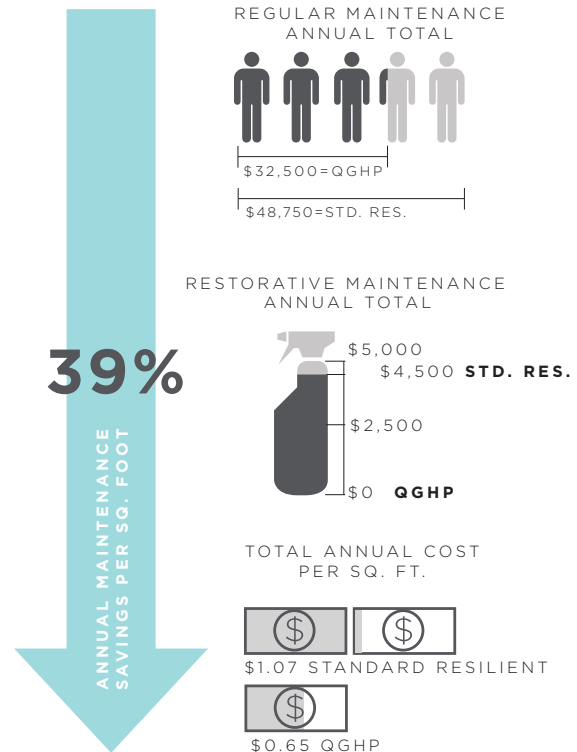

CUMULATIVE COST PER SQUARE FOOT BY YEAR

Break Even on Product and Maintenance Cost Difference Between:
VCT VS. QGHP = **3 YEARS**

ANNUAL MAINTENANCE COST SAVINGS: STANDARD RESILIENT VS. QGHP 50,000 SF FACILITY

MOH HARDNESS SCALE

10=

9= QGHP

7= Quartz

2= Urethane without aluminum oxide

The highest performance commercial urethane finish in the industry. The patented aluminum oxide UV cured wearlayer eliminates the need for polish, while enhancing durability, cleanability, appearance retention and slip resistance when compared to standard resilient floors.

MADE IN THE USA

America is rediscovering the importance of manufacturing jobs for our economy and our future. Jobs build communities; when they disappear, so does our ability to stand strong and grow.

We are a fourth generation, family-owned company that makes flooring in eight communities across the U.S. – deeply committed to the places where we work, to keeping people employed, and manufacturing quality, American-made products. When you order flooring from Mannington, you're part of this mission.
